

# MATEUS TOLEDO

Full-Stack Software Developer

Juiz de Fora, MG | [linkedin.com/in/mateusmtoledo](https://www.linkedin.com/in/mateusmtoledo) | [github.com/mateusmtoledo](https://github.com/mateusmtoledo) | [mateusmtoledo1@gmail.com](mailto:mateusmtoledo1@gmail.com) | +55 32 98835-3739

## SKILLS

Typescript	React	Node	MongoDB	Jest	Git	Test methodologies
Test Driven Development (TDD)		SOLID	Clean Code			

## PROJECTS

### FANCYBOOK

[Website](#) | [Repository](#)

A full-stack social network app, built in React, Node and MongoDB.

- Wrote unit and integration tests, with above 80% code coverage across front and back end, with Jest, React Testing Library and Supertest.
- Built a React front end with over 50 components styled via Styled Components, with responsive design, client-side routing, infinite scrolling using the Intersection Observer API and a system that allows components to emit toast notifications using the useContext hook.
- Developed a NodeJS Rest API with over 30 routes and user authentication via PassportJS, using Local and OAuth (Google, Twitter and GitHub) strategies, features such as user friendships, posts, comments, likes and uploading user profile pictures to CDN.

### FAKE STORE

[Website](#) | [Repository](#)

A web store made with Typescript, React and CSS.

- Developed the application entirely through TDD practices (Test-First Approach).
- Implemented a system for filtering and sorting products utilizing custom React Hooks.
